PROFESSIONAL SUMMARY

Full Stack Software Engineer with 2+ years of professional experience delivering production-ready web and mobile applications, specializing in the Laravel and Node.js ecosystems. Proven track record building enterprise platforms serving 500+ users, leading intern teams, and owning end-to-end delivery from architecture to Linux-based deployment. Strong focus on scalable system design, clean UI/UX, and cross-platform solutions, with a growing foundation in cybersecurity and networking.

CORE SKILLS & TECH STACK

Languages	PHP, JavaScript, TypeScript
Frontend	React, Next.js
Backend & APIs	Laravel, NestJS, REST, GraphQL
DevOps	Linux Servers, Docker, Git, CI/CD
Databases	MySQL, PostgreSQL
Cross-Platform	React Native, Electron

PROFESSIONAL EXPERIENCE

Full Stack Software Engineer *Dec 2022 - May 2024*

Myanmar Software Integrated Solutions (MSIS) - PHP Web Application Department | Yangon, Myanmar

- Led development of enterprise-grade full-stack web platforms using Laravel, React, and RESTful APIs, serving 100+ internal users across multiple departments in daily production operations.
- Contributed as primary full-stack developer for core modules of the Service Ticket Management System, supporting 500+ users per client with stable performance and minimal downtime.
- Participated in system architecture planning, requirement analysis, and database design; developed front-end, back-end, and API services for web and mobile integration.
- Led and mentored interns by assigning tasks, reviewing code, and providing technical guidance throughout the project lifecycle.
- Deployed and maintained production environments on Linux (Apache), collaborating with QA, mobile, and support teams to ensure stability.
- Maintained and extended multiple legacy production platforms, improving stability and delivering new features under live production constraints.

Software Solution Intern *Sep 2022 - Nov 2022*

MSIS - Odoo ERP Solution Department | Yangon, Myanmar

- Analyzed client business workflows and requirements to support ERP-based digital transformation across manufacturing, medical, livestock, and beverage sectors.
- Supported Odoo ERP implementations and solution mapping for multiple industries.

Software Tester Intern *Jun 2022 - Aug 2022*

MSIS - C#.NET Enterprise Software Department | Yangon, Myanmar

- Executed end-to-end manual testing across enterprise applications (Hospital Management, HR Management), identifying functional and usability issues prior to release.
- Presented systems to external clients, delivered user training sessions, and produced clear user documentation.

KEY PROJECTS

01. Service Ticket Management System - Internal Operations Platform

- Designed and delivered a centralized service ticketing platform handling request lifecycle: creation, assignment, escalation, approval, SLA monitoring, and resolution tracking.
- Designed role-based access control with configurable approval workflows for equipment, spare parts, and service maintenance operations.
- Helped clients digitize verbal service workflows, improving operational transparency and task tracking with centralized digital records.
- The system successfully supported 500+ users per client deployment with stable uptime.

02. School Management System - Internal Web Application

- Contributed as front-end developer for a full-stack academic management platform supporting enrollment, attendance, exams, fees, timetables, and multi-role access.
- Built features for student and guardian portals, enabling parents to monitor academic progress and attendance in real time.
- Assisted in end-to-end system testing across web, iOS, and Android platforms; collaborated with senior developers to implement assigned features.
- Supported flexible course and program management with customizable pricing, discounts, events, and enrollment workflows.

03. Website Content Management Panel - Enterprise CMS

- Built custom CMS panels enabling non-technical users to manage pages, banners, media assets, and website content through admin dashboards.
- Delivered solutions for multiple enterprise clients including automotive industry platforms, acting as both primary and secondary developer across projects.
- Integrated analytics, performance tracking, and streamlined publishing workflows; maintained and enhanced legacy production systems.

EDUCATION

BSc (Hons) in Cybersecurity and Networks 2024 - 2025

Teesside University | MDIS Campus, Singapore

- Advanced coursework in network security, vulnerability assessment, risk management, security monitoring, and enterprise-level infrastructure governance.

Diploma in Information Technology 2023 - 2024

OTHM Qualification | Business Institute Yangon Campus, Myanmar

- Comprehensive IT training in system design, programming, networking, incident response, and system administration.

CERTIFICATIONS & ADDITIONAL TRAINING

- **Optimum (2023):** Hardware & Network Practical Workshop - PC Assembly, Windows Server, ADDS, Cisco Packet Tracer
- **RIG (2022):** Web Fundamentals & PHP - HTML/CSS, JavaScript, PHP, Laravel, DBMS
- **RIG (2022):** Microsoft .NET Framework & C# - C#.NET Core, ASP.NET, C/C++
- **SITE x FESTO (2018-2019):** Certificate in Industrial Technologies - Automation, Mechatronics, Robotics, Facilities
- **Professional Graphic Design (2018):** Adobe Photoshop, Illustrator, Canva, Figma, UI/UX
